

FRIDAY NIGHT SCIENCE

with *Hooked on Science's* Jason Lindsey

Children Ages 6-12 will learn about....

Bugs - March 23

Find out all about bugs by turning the classroom into a bug lab. Students touch Madagascar hissing cockroaches and many other bugs. You will even see the world through insect eyes using "I-Glasses."

America's Wildlife - April 27

Discover information about the beaver, coyote, raccoon and rabbit by examining their pelts, skulls, scats and tracks. Find out how these animals represent omnivores, herbivores, and carnivores.

Earthquake - May 18

Learn all about earthquakes while creating an earthquake in the classroom! Students design and build structures and then use an earthquake board to test the structure.

Emerging Technology Center

Room 141

5:00-7:00 p.m.

\$20.00 per class
